On behalf of Manitoba Agriculture and the Province of Manitoba, it is my pleasure to welcome you to Manitoba Ag Days 2018.

Ag Days is an opportunity for conversation, collaboration and celebration. Having producers, industry and government come together in one place is an excellent opportunity to learn from one another. Ideas and solutions to new issues are discussed. We also need to celebrate. Our industry works hard and needs to take a few minutes to recognize how far we have come and what the future holds in store for us.

I invite you to walk through the displays and see how technology and innovation is changing our business. Take advantage of the opportunity to talk to the folks in the booths. Connecting with those in attendance is a way for them to learn about your needs and to offer their expertise.

As you make your way through the booths and seminars, I would also encourage you to talk to our Manitoba Agriculture staff. We are here to listen and to engage in discussion. These events are a great way for us to share with you the tools and supports that are relevant and responsive to your needs.

Networking also occurs when in your seats and the hallways. Ag Days brings the ag community together so its members can talk to each other, offer support and exchange ideas. There is great value in that.

Thank you to the organizing committee and all in attendance for continuing to make this a premiere event for the agricultural community in Western Canada.

Enjoy Ag Days 2018.

Sincerely,

Mayor Rick Chrest

AGRICULTURE was the backbone of the settlement of the City of Brandon 135 years ago, and it continues to be a cornerstone of our economy to this day. Brandon takes very seriously its role as the second largest City in the Province and as the regional hub of Western Manitoba.

To that end, we are honoured to play host on an annual basis to Manitoba Ag Days and I’m thrilled to welcome all exhibitors, sponsors and participants to the 41st Anniversary of the show.

Agriculture is an ever evolving complex business that relies on continuous advancement of technology, equipment, expertise and best practices. As Canada’s Largest Indoor Farm Show, Ag Days provides producers and suppliers an unparalleled opportunity to learn, share and make contacts. With over 550 exhibits and 50,000 visitors, Ag Days has a stature envied throughout North America. Our Keystone Centre, which has been developed with agriculture in mind, is the ideal facility for a show of this kind.

On behalf of Brandon City Council and our 50,000 residents, please accept our warm welcome. Congratulations to the Board of Directors, volunteers, show staff, exhibitors and participants on another outstanding event. I trust the show will prove fruitful in the advancement of your industry and that you will enjoy connecting with friends and colleagues.

Sincerely,

Mayor Rick Chrest
Welcome to Manitoba Ag Days 2018 for our 41st show. We are very excited to present to you Canada’s Largest Indoor Farm Show; a show filled to capacity featuring the latest in equipment, technology and information. 2017 was a year for the books!!

Some Manitoba growers experienced record low rainfalls, some experienced record high rainfalls, some experienced average to above average yields while others put the “crop of a lifetime” into the bins! With every growing season we all wonder “Is there a new or better way to do this?”

Ag Days is certainly the place to find the answers to your questions from our many exhibitors or possibly even from a fellow farmer you may meet up with on the red carpet or in the seminar rooms. The popular features such as The Inventor’s Showcase, The New Inventions and the Farm Safety Features will all be back and bigger than ever!

We also have a full barn for Bull Congress and the seminar theatres are hosting over 60 speakers this year! This show will not disappoint!

We are very proud of the fact that our show is 100% Pure Farm. This means that all of our exhibits are required to be of an agricultural nature so farm business is the focus. With over 10 acres of exhibits making us Canada’s Largest Indoor Farm Show this is your one-stop shop for all your agricultural needs.

A great way to find exhibitors is by simply going to www.agdays.com and search for an exhibitor or use our new interactive mapping on the web. At the Show our friendly information staff is always available and willing to help you find what you’re looking for or stop by the show office and someone will lead you in the right direction.

This year we are running with the theme “THE YEAR OF THE YOUNG FARMER”. We really want to engage the next generation and get them out to Ag Days! We are going to have a Young Farmers Lounge at Ag Days and a Young Farmer selfie station! Young Farmers will be highlighted all over our show!

Let’s show the other provinces that Manitoba is Ag Proud! And who knows... you might just win an awesome grand prize if you participate.

Thank you to the many sponsors of Manitoba Ag Days; our show would not be the success it is without your partnerships! Thank you for supporting not only our show but this amazing industry! You will find our sponsors mentioned on various pages in this guide; please take the time to thank them when you visit them at their displays!

This year we are running with the theme “THE YEAR OF THE YOUNG FARMER”. We really want to engage the next generation and get them out to Ag Days! We are going to have a Young Farmers Lounge at Ag Days and a Young Farmer selfie station! Young Farmers will be highlighted all over our show!

We look forward to seeing you at Ag Days 2018 – It’s Where the Ag Year Begins.

Brad Crammond & David Laudin

THE WESTERN PRODUCER

MANITOBA a g DAYS SHOW GUIDE 2018

SUPPLEMENT TO THE WESTERN PRODUCER
Thursday January 18

**SOYBEANS, SOYBEANS, SOYBEANS**

9:15 AM Soybean Production 101 – Panel Discussion
Carl Bangert
Producer, Beausejour, MB
Charles Stewart
Producer, Oak River, MB
Luc Remillard
Producer, St. Joseph, MB

10:30 AM Soybean – Canola Rotation: Why Not? A Pathologist’s Perspective
Holly Derksen
Field Crop Pathologist, Manitoba Agriculture

11:00 AM The Ultimate Soybean Challenge: Applying Research to the Farm
Cassandra Tkachuk
Production Specialist, Manitoba Pulse & Soybean Growers

11:30 AM Soybean Variety Selection – A Soybean is No Longer a Soybean!
Dennis Lange
Provincial Pulse Specialist, Manitoba Agriculture

AGRONOMY – THE MIXED BAG

1:00 PM Weather for 2018? Expect the Unexpected!
Andrew Nadler
Agricultural Meteorologist, Peak HydroMet Solutions

1:45 PM Big Yields Mean Big Nutrient Consumption
John Heard
Crop Nutrition Specialist, Manitoba Agriculture

2:30 PM Crop Rotations – Slippery Slope or Economic Opportunity?
Anastasia Kudincev
Manager of Crop Industry Development, Manitoba Agriculture

**MANITOBA Beef & FORAGE INITIATIVE PROGRAM**

1:00 PM How Will Recent Tax Changes Impact the Farm
Edith Prison
Business Advisor, Taxation Services, MNP LLP

1:30 PM Seeking Sustainability Through Innovation: A Look at the Cattle Industry
Kim Ominski
Professor, University of Manitoba

1:50 PM Manitoba Beef & Forage Initiatives Inc. – Driving Innovation on the Farm
Ramona Blyth
Chair, Manitoba Beef & Forage Initiative Inc.

2:10 PM Trying to Fit “In” Sustainability
Trevor Atchison
Producer, Pipestone, MB

2:30 PM A Producer’s Perspective on Building Sustainable Cattle Ranching Practices
Joey Bootsman
Rancher, Rapid City, MB

2:50 PM Evaluation of Soil Health Under Different Grazing Management Systems in Manitoba
Dr. Terence McGonigle
Professor, Brandon University

**AN ECOSYSTEM APPROACH TO FARMING FOR IMPROVED PROFITABILITY, STEWARDSHIP & JOB SATISFACTION**

9:40 AM Not My Grandpa’s Organic Farm
Katherine Stanley
Organic Extension Specialist, Manitoba Organic Alliance/University of Manitoba

10:10 AM Cash Cropping With Intercrops
Colin Rosengren
Producer, Midale, SK

11:10 AM Organic Production 101 – Panel Discussion
Alan McKenzie
Producer, Nesbitt, MB
Andrew & Patty Harris
Producers, Stonewall, MB
Alexander Boersch
Producer, Elie, MB

Come join us to Kick Off Ag Days 2018 with a hearty breakfast! A minimum donation of $5 is required, with all donations going to Agriculture in the Classroom. Let’s help educate our youth about Agriculture! Breakfast starts at 7:30 AM and runs until 8:45 AM. Thank you to our major sponsors: CANAD INNS, The Roadhouse and Q-Country.

Proudly Sponsored by:

**PATRON OF THE DAY**

**SUPPLEMENT TO THE WESTERN PRODUCER**

**SUPPLEMENT TO THE WESTERN PRODUCER**
Manitoba Ag Days
Seminars & Workshops

Manitoba Canola Growers Program
Tuesday, January 16th — AM
FCC Theatre

- **9:00 AM**
  **How Did That Happen?! – A Review of Canola Production in 2017**
  Angela Brackenreed, Agronomy Specialist, Canola Council of Canada
  With the majority of the province experiencing below average rainfall, a hot and dry July and high insect pest activity, lots of us are left wondering where the yield came from. We will explore how 2017 will impact the 2018 cost of production and how we plan for future years.

- **9:30 AM**
  **Precision in Canola**
  Shawn Senko, Agronomy Specialist, Canola Council of Canada
  A look at current Precision Ag practices, their contribution to canola production and their Return on Investment.

- **10:00 AM**
  **100 Bushel Canola Yield – Little Things Matter!**
  Florian Hagmann, Producer, Birch Hills, SK
  Florian will share how he has successfully grown high yielding canola year after year. The attention to details and ensuring that those details are taken care of in a timely manner are key elements of his success. Florian has been successful in growing over 100 bu per acre of canola! He likes to learn from other farmers as well as share his thoughts on why doing the “Little Things Matter!”
Manitoba Canola Growers Program
Tuesday, January 16th — AM
FCC Theatre

- 11:00 AM
  Survival Guide to Marketing – From Field to Market
  Dustin Gabor, Owner, Grain Shark
  Dustin runs through all the tools he uses on a day to day basis using canola as the focus example. He will also give you a better understanding of how to easily keep track of the market, and will provide a current forecast of where things are headed!

Manitoba Wheat & Barley Growers Program
Tuesday, January 16th — PM
FCC Theatre

- 1:00 PM
  Nitrogen Management for High Yielding Spring Wheat in Manitoba
  Amy Mangin, PhD Candidate, University of Manitoba
  High yielding spring wheat varieties being grown in Manitoba, along with improved agronomic practices, have challenged our traditional nitrogen (N) fertilization strategies. The main objective of this project was to determine appropriate nitrogen rates, timings and sources to maximize yield and protein levels in two varieties of spring wheat commonly grown in Manitoba: AAC Brandon (CWRS) and Prosper (CNHR). A summary of results will be presented for trials conducted across Manitoba during the 2016 and 2017 growing seasons. Rates of N applied entirely in the spring (urea and/or ESN), as well as in split N applications (combinations of spring and either stem elongation or flag leaf) were evaluated. Post anthesis, foliar applications of UAN and urea solution were also investigated. A number of tools for mid-season evaluation of yield and protein sufficiency during the growing season were examined including, GreenSeeker, SPAD meter, tissue tests, and soil testing.

- 1:30 PM
  What Puts the “Malt” in Malting Barley?
  Lorelle Selinger, North American Merchandising Manager, Cargill Malt
  In ancient Greece, barley was used as a super food for gladiators. In ancient Egypt, barley served as a currency. In the 1300’s, the King of England declared that one inch should be the measure of three barley kernels. Today in Canada, we grow over eight million metric tonnes of barley, over half of which is malting varieties. Malting barley, converted to malt, is primarily used in the brewing of beer, but is also used in spirits and many food products. What makes malting barley, malting quality? What specifications are important to maltsters and why?

- 2:00 PM
  Breeding Technologies Hit the Field
  Dr. Curtis Pozniak, Professor, Crop Development Centre, University of Saskatchewan
  Curtis’ presentation will focus on recent developments in wheat breeding technologies and their application in his wheat breeding program at the Crop Development Centre, University of Saskatchewan. Specifically, he will focus his talk on those technologies that show promise to increase breeding efficiencies, with the goal of developing new and improved wheat cultivars for Western Canadian produce.
Manitoba Wheat & Barley Growers Program
Tuesday, January 16th — PM
FCC Theatre

■ 2:30 PM
We Have the Wheat Genome Sequence – Now What?
Richard Cuthbert, Wheat Breeder, Agriculture & Agri-Food Canada

We are experiencing a time of unprecedented molecular technology innovation in wheat. In 2017, a full wheat genome sequence was released to the public. How can wheat breeders use this enormous resource to develop new wheats which respond to economically important production challenges like fusarium head blight, evolving rusts, and climate extremes while maintaining targeted market class acceptance?

■ 3:00 PM
Increasing Farm Organization Impact
Rob Hannam, Founder, Synthesis Agri-Food Network

Five provincial farm organizations are investigating the potential to have more impact for farmer members by merging together. The Manitoba Corn Growers Association, Manitoba Pulse & Soybean Growers, Manitoba Flax Growers Association, National Sunflower Association of Canada and the Manitoba Wheat and Barley Growers Association have been exploring this opportunity. Rob Hannam has been facilitating this process and will share the proposal that has been developed by a farmer led steering committee from the five organizations.

■ 3:30 PM
Marketing is a Four Letter Word
Brian Voth, President, IntelliFARM Inc.

Grain marketing is never without it’s challenges. Whether it’s the wrong timing and panic selling, rallies during the growing season which mean taking on production risk, or a plethora of quality issues to deal with; grain marketing well has never been easy. Possibly the bane of most farm operations, more often than not marketing is where money is left on the table. How do you manage price risk with production risk? The key is having a plan, and sticking to it.

More Crops, Same Acres
Tuesday, January 16th — AM
MNP Theatre

■ 9:00 AM
High Yields – What is Possible & What is Not
Dr. Rigas Karamanos, Senior Agronomist, Koch Fertilizer Canada, ULC

Maximum yield is a function of crop genetics, solar radiation, water, and nutrients. This presentation will attempt to answer what crop yields are possible and what fertility and moisture levels are required to get there. Fertility products are necessary to meet plant fertility needs, so a discussion on how to decide whether a product works or not will follow. A “good” product should provide both agronomic and economic benefits to producers. Its behavior must be predictable within reason and its application supported by ample scientific evidence.

■ 9:45 AM
Pushing the Crops Genetic Potential – Agronomic Practices to Make it Pay
Jarrett Chambers, President, ATP Nutrition

Jarrett will highlight key management practices required to hit their yields of 91 and 94 bushel per acre on canola and yellow peas, respectively. Currently, the average Canadian yield for a canola and pea crop are close to 36 and 40 bushels per acre. This is only 50% of the yield when compared to some other countries and is definitely not even close to these crops maximum genetic yield potential. Jarrett will focus on the agronomics of growing 90+ bushel per acre crop and will bring insights into different ways in achieving this, along with different sampling techniques to better understand the health of the plant. There will be emphasis on the importance and ultimately the impact of correct and proactive nutrient management has on the crop. This is a must see seminar to be engaged into how proper plant nutrition can bring a crop closer to its genetic yield potential.

■ 10:30 AM
Healthy “Living” Soils Grow Crops
Greg Patterson, President, A&L Laboratories Inc.

Soil Health is on everyone’s mind and people are seeking more sustainable agriculture with a reduction in the use of synthetic fertilizers and pesticides. Soil Health is a combination of biological, chemical and physical properties that determine the Soil Quality. These two terms will continue to overlap as we look at soil, not just as a lifeless inert growing medium, but more as a living, dynamic and continually changing ecological environment.
Seminars & Workshops

**More Crops, Same Acres**
**Tuesday, January 16th — AM**
MNP Theatre

- **11:30 AM**
  **Soil Health in a Changing Climate: A New Research Project**
  **Stephen Crittenden, Research Scientist, Agriculture & Agri-Food Canada**

Which farming system will be more resistant to changing growing conditions? Climate change is expected to bring more frequent summer drought to the Canadian Prairies so crop growing conditions will be increasingly stressed and risk of yield losses and failure could increase. Crops need water to grow and the supply of nutrients is reduced under drought conditions, thus growth and yield are lessened. Heavy rainfall washes away nutrients, seals soil, and damages crops. Reduced soil tillage intensity systems (e.g., no-till) lessen soil disturbance, which promote soil structure that shifts water and nutrient fluxes. Crop irrigation relieves water stress and promotes plant growth increasing soil organic matter input to soil. Reduced tillage systems and irrigation may on one hand promote healthy functioning soils that result in higher crop yields but on the other hand disease pressures and greenhouse gas (GHG) emissions may increase. A balance must therefore be struck between practices beneficial for water and nutrient fluxes and risks involved with greater potential for Fusarium head blight (FHB) and GHG emissions. The proposed project will evaluate the impact of soil tillage intensity and irrigation on soil health, GHG emissions, soil and microbial biodiversity, and incidence and severity of FHB under drought and heavy rainfall conditions.

**Market Outlook & Mind Lookout**
**Tuesday, January 16th — PM**
MNP Theatre

- **12:45 PM**
  **Ag Days Gives Back Award Presentations**
  **Andrea Guthrie, Manitoba Ag Days Committee**

- **1:00 PM**
  **The Tax Consequences of Doing Business in the United States**
  **Todd Jenkins, International Tax Specialist, MNP LLP**

Whether you make sales to, provide services in, or ship goods to the U.S. you may have triggered a U.S. federal or state filing obligation. It’s important to understand your U.S. tax obligations so you can stay compliant with the increasingly complicated U.S. federal and state tax laws. Todd will also provide insights on the U.S. tax consequences to non-compliant U.S. citizens and discuss the tax impacts for Canadians renting U.S. property or selling property in the U.S.

- **1:30 PM**
  **Dignitaries Address**
  **The Honorable Ralph Eichler**
  **Minister of Agriculture**

  **His Worship Rick Chrest**
  **Mayor of City of Brandon**

- **2:00 PM**
  **Agriculture is More Than Just Farming**
  **Rosemund Ragetli, Canadian Young Speakers for Agriculture Junior Champion, Winnipeg, MB**

This speech will provide a brief overview of the scientific, political, and regulatory aspects of the Canadian Agriculture Industry, highlighting that this vast industry is not solely comprised of the actual farming operation, but also of significant and fundamentally crucial sectors which influence and direct the current Agriculture Industry in Canada.
Market Outlook & Mind Lookout

Tuesday, January 16th — PM
MNP Theatre

■ 2:15 PM
Making Sense of the Dollars & Cents
Errol Anderson, President, ProMarket Communications Inc.
How does it all tie together? Central bankers continue to ease monetary policy in a desperate effort to kick-start inflation and economic growth, but with little success. U.S. stock markets have surged to record-breaking highs while global commodity prices battle deflationary pressures. Grain, livestock, and currencies are all impacted which directly impact everyone’s business. This is a session about the reality of strained global economics and its impact on ag commodity prices. Business strategies to mull over heading toward the spring market will be discussed.

■ 3:00 PM
How a Tweet Sparked a Conversation About Mental Health in Ag
Kim Keller, Producer, Melfort, SK
One tweet opened a floodgate and started a very important and much needed conversation around mental health, farm stress and suicide in Ag. This conversation continues today throughout the industry while focusing on resources for farmers, understanding what mental health is and isn’t, as well as the role we all play in breaking the stigma surrounding our mental health.

■ 3:20 PM
Breaking Down Barriers: My Mental Health Journey
Lesley Kelly, Producer, Regina, SK
After sharing a live video this past summer of her and her husband’s stories of dealing with mental health that sparked a conversation both on and offline, Lesley will speak to what sparked them to create the video and her and her husband’s journey together on mental wellness and trying to break the barrier and stigmas on mental health.

■ 3:40 PM
Feeling “Down” On The Farm
Marsha Harris, Marriage & Family Therapist, Brandon University
There is considerable evidence to support the stereotype of farmers and farm families as being tough and resourceful. There is also considerable evidence that stress, anxiety, depression, emotional exhaustion and burnout are higher among farmers and farm families than among other populations. It is possible to experience both sides of this coin at the same time: to be tough and resourceful as well as experiencing a mental health concern. Farm people learn from an early age to put on a brave face and work through their problems. It is one of the many characteristics that make farmers successful. But, it can also mean that farmers are less likely to acknowledge they are struggling, and to seek help when they need it. It takes courage to talk about mental health. It all starts with learning more about what mental health is, and the signs that you or your loved one might be struggling. It means reaching out for support when and if you need it. Join the discussion to tap into the resourcefulness of farmers and farm families and build the conversation about mental health and impacts on our farming communities.
Money On My Mind
Wednesday, January 17th — AM
FCC Theatre

■ 9:15 AM
**Time to Step Up Your Grain Game!**
Darren Bond, Farm Management Specialist, Manitoba Agriculture
Touchdown! You know your grain farm’s costs of production, but now what? We’ve all heard that we should know our costs of production, but what can we do with that information? Darren will discuss this topic including identifying risks to the farm, determining the likelihood of profitability and developing an early warning system for problems on the farm. Also learn about the latest trends in crop production costs, yields and profitability in Manitoba. The ability to make your farm profitable has never been more attainable than now with these important management techniques!

■ 10:00 AM
**Rendering the Farm More Profitable**
Jean-Guy Talbot, FCPA, FCGA, Founder & CEO, Talbot & Associates
Justin Chaput, Partner, Talbot & Associates
Geared for any farm operation that wants to be more profitable, and who doesn’t want that, this session will give an overview of the areas that can have significant impacts on your bottom line. Join Jean-Guy and Justin as they discuss Risk management/mitigation, using analytics to your advantage, having the proper financing products, proper capital investments, and taking advantage of all tax rules.

■ 11:00 AM
**Western Canadian Agriculture – Trumped!**
Craig Klemmer, Principal Ag Economist, FCC
The Western Canadian agriculture environment is constantly evolving. Central banks are beginning to unwind stimulus in the economy, Canadian trade negotiation are on-going, and oil prices are finding a new equilibrium. What are the opportunities and risk for Western Canadian agriculture? How will trade negotiations impact Canada-U.S. relation and supply chains.

It’s All About the Beef!
Wednesday, January 17th — PM
FCC Theatre

■ 1:00 PM
**Stake on Hooves – Where’s the Money?**
Sandy Russell, Partner, Spring Creek Land & Cattle Consulting
Sandy will provide a dynamic overview of the current status of the North American beef cattle industry along with current factors that are influencing pricing providing both near and long term forecasts. She will focus on key drivers to monitor to determine price direction moving forward to assist Canadian cattle producers with their marketing decisions.

■ 2:00 PM
**Grooming Future Leaders for the Beef Industry**
Brett McRae, Manitoba Delegate, Young Cattlemen’s Council
Brett will be speaking about the programs that the Canadian Cattlemen’s Association offers to young producers including the Cattlemen’s Young Leaders program and the Young Cattlemen’s Council. He will also talk about other ways that young producers can get involved in the beef industry. If you are passionate about agriculture, especially beef, this talk is for you!

■ 2:30 PM
**Silage: How to Harvest More Value Per Acre!**
Ray Bittner, Livestock Specialist, Manitoba Agriculture
Silage costs more per acre than dry hay, but often can be a better value for your farm. Ray will go through the tips and tricks of making a better final product and lowering your overall livestock cost of production. Whether you make chopped or bale silage, or even are still sitting on the fence to make silage at all, this presentation is for you.

■ 3:15 PM
**Tails from the Cattle Pen**
Dr. Cody Creelman, Veterinarian, Veterinary Agri-Health Services
Dr. Cody Creelman, a beef cattle veterinarian and vlogger, speaks to the origins of his journey as a digital storyteller and how it has forever impacted his practice, his family, and himself.
Where the Water Flows
Wednesday, January 17th — AM
MNP Theatre

9:15 AM
Tile Drainage 101 – Panel Discussion
Todd Walker, Partner, Frontier Drainage Systems
Aaron Hargreaves, Producer, HarWest Farms LP
Ginette Caillier, Senior Water Resources Officer, Manitoba Sustainable Development

Understanding the benefits of tile drainage: how it works, what steps we take and how it can benefit your land and surrounding area. Start to finish, hear from a producer, an installer and the regulatory governance.

10:30 AM
Watershed Management Across the Fence Lines – Challenges & Opportunities
Dr. Allan Preston, Chair, Assiniboine River Basin Initiative

Water flows across many fence lines, many borders, and management of this valuable, but at times frustrating, resource, falls back on all of us in the watershed. The Assiniboine River Basin Initiative (ARBI) was formed in 2014 by a diverse group of stakeholders across the Qu’Appelle, Souris and Assiniboine sub-basins. ARBI’s vision is to work together to achieve a resilient Basin where comprehensive integrated watershed actions will benefit current and future generations. In order to achieve this vision, a framework plan has been developed to guide ARBI and its partners on the path forward, and ensure that a variety of tools are in the “fencing box”. One of these tools is the Manitoba Forage and Grasslands Association Aquanty Project. This project seeks to develop a detailed hydrogeospheric (HGS) model for the Basin, and new risk management tools to reduce the impact of extreme flood or drought events for the agricultural industry within the Basin. Just like good fences, good water management makes for good neighbors.

11:15 AM
Managing Surface Water on Farm to Achieve Both Agricultural & Environmental Benefits
Dr. David Lobb, Professor, University of Manitoba

Farmers have a variety of practices available to them to manage surface water on their land. David will discuss these practices in terms of their agricultural benefits and their environmental benefits with respect to downstream nutrient and water losses.

Buying With Confidence: Executing Your Equipment Plan
Peter Manness, Farm Management Consultant, MNP LLP
Leasing vs. Buying is the question that gets asked the most regarding equipment purchases, but it is only one small part of managing your equipment replacement plan. Flipping your entire fleet every year is not an option for most farms, but not buying anything might not be the greatest tactic either. Understanding the short and long-term impacts of your equipment buying decisions is an essential part of your farm’s success.

■ 1:30 PM
SWAT MAPS: Making Variable Rate Great Again
Cory Willness, President, CropPro Consulting
Soil, Water and Topography (SWAT) map layers are the most important component of a variable rate fertilizer and seed program. CropPro patented SWAT MAPS, a process that integrates these three key layers into a single map. Yield potential maps are useful, but adding soil potential maps makes variable rate great.

■ 2:15 PM
Fusarium Damaged Grains...Options
Dr. Rex Newkirk, Associate Professor, University of Saskatchewan
What is the most efficient and cost effective method to recover high quality grain from your fusarium infected wheat and barley? What are the advantages and disadvantages of each approach? The objective of this presentation is to explore cleaning, sorting and processing options to recover value from your infected wheat, durum and barley. Cleaning processes to remove the most infected samples is the starting point for all processes and in some cases will achieve your goals. However, if you need to meet the very tight standards for Vomitoxin for barley for Malt or Wheat and Durum for the milling industry, additional processing technology is required. This presentation will explore and discuss each of these technologies including, density separation, optical sorting and Near Infrared sorting using the BoMill. Come and discover for yourself which technology can recover the maximum value from your infected crops.

■ 3:00 PM
Star Wars & Star Trek: How Precision Ag May Land in the Farm of the Future
David Yee, Vice President of Operations, Prairie Agricultural Machinery Institute (PAMI)
The landscape of Precision Ag from an equipment and machinery aspect is rapidly changing. Non-traditional companies and participants are focusing on bringing high tech to agriculture in hopes of improving agronomic and economic results on farms. This presentation will offer a sneak peek on some of the emerging technologies that are being developed for the farm of the near and distant future.

■ 3:30 PM
Farming Re-Imagined: Dot Autonomous Power Platform
Trent Meyer, Executive Vice President, Dot Technology Corp
Imagine a different way. Autonomous cars will soon be driving the streets of the world; these cars can guide themselves without a human conducting any operations. In agriculture, standardized autonomous ‘power units’ have the ability to complete limitless tasks for farmers while freeing their time for other work. The DOT Power Platform is a mobile diesel-powered platform designed to handle a large variety of implements commonly used in agriculture, mining and construction. Its U-shaped frame facilitates the direct loading of implements, so that, once loaded, the implement “becomes one” with the mobile powered platform. DOT’s short- and long-range sensors make the power platform more accurate and attentive than any human. DOT constantly updates itself with images of the physical world around it and processes the data at lightning speed. Working for farmers, DOT completes tasks remotely and autonomously and enables farmers to spend more of their time focusing on the overall operation of their farms. Or in other words, we are re-imagining how farming can be done from the ground up.
Soybean, Soybeans, Soybeans
Thursday, January 18th — AM
FCC Theatre

■ 9:15 AM
Soybean Production 101 – Panel Discussion
Carl Bangert, Producer, Beausejour, MB
Charles Stewart, Producer, Oak River, MB
Luc Remillard, Producer, St. Joseph, MB

Manitoba soybean acres continue to grow. With this growth, producers have had many different experiences with the crop and this panel would like to share their experiences with other producers at the 2018 Ag Days show. This group will talk of soybeans on their farm dealing with both successes and challenges for future production.

■ 10:30 AM
Soybean – Canola Rotation: Why Not? A Pathologist’s Perspective
Holly Derksen, Field Crop Pathologist, Manitoba Agriculture

With the increasing acres of soybeans across Manitoba, growers are deciding where they best fit within their existing rotations. While many factors will contribute to this decision, growers needs to consider disease issues (sclerotinia, root rot, etc.) and decide how to best balance their risk.

■ 11:00 AM
The Ultimate Soybean Challenge: Applying Research to the Farm
Cassandra Tkachuk, Production Specialist, Manitoba Pulse & Soybean Growers (MPSG)

Cassandra will describe and present the results of the 2017 Ultimate Soybean Challenge (USC) held at Agriculture & Agri-Food Canada/Canada Manitoba Crop Diversification Centre in Portage la Prairie. She will outline how research results from the MPSG On-Farm Network was used to select best management practices for production including seeding rate, inoculation and seed treatment. She will then reveal who was crowned the winner of the USC.

Soybean, Soybeans, Soybeans
Thursday, January 18th — AM
FCC Theatre

■ 11:30 AM
Soybean Variety Selection – A Soybean is No Longer a Soybean!
Dennis Lange, Provincial Pulse Specialist, Manitoba Agriculture

Soybean acres continue to expand across the province. 2017 saw Manitoba producers plant almost 2.3 million acres of soybeans. Manitoba growers have many new varieties and herbicide systems to deal with this year. From Roundup Ready to Extend soybeans, Conventional soybeans, Liberty tolerant soybeans and in the near future Enlist soybeans, all have potential to be grown within the province. Dennis will be reviewing the 2017 season and will be discussing how these new systems have been working for Manitoba growers.

EARN A SUBSTANTIAL RETURN ON YOUR CLEARFIELD® & NEXERA™ CLEARFIELD CANOLA

With Clearfield® and Nexera™ Clearfield canola you have the opportunity to earn more revenue per acre. You have access to on-farm pick-up options, a higher return, competitive basis levels as well as year-round scheduling.

For more information on how you can earn more with Vitera, talk to your local Vitera Representative today.

Visit AGDAYS.COM for more information.

1:00 PM
Weather for 2018? Expect the Unexpected!
Andrew Nadler, Agricultural Meteorologist, Peak HydroMet Solutions

If there’s one thing a prairie growing season can teach us, it’s to expect the unexpected! This statement is usually followed by a string of bad news that has afflicted crops – floods, droughts, heat waves, frost, hail, disease... The 2017 growing season proved to be different. Despite being one of the driest on record, yields turned out to be much higher than expected. Quality was excellent. So, what does this mean for next year? Does it mean anything? Will Mother Nature seek her vengeance? This presentation will take a look at where we are now and provide a glimpse of what to expect for weather next growing season.

1:45 PM
Big Yields Mean Big Nutrient Consumption
John Heard, Crop Nutrition Specialist, Manitoba Agriculture

Cereal and canola crops produced some very good yields in 2017, in spite of low growing season rainfall. The nutrient removal by such a crop can be high and growers should account for such removal with soil testing and appropriate fertilization. Considering we under fertilized for the crop that was harvested and removed excess straw how do we manage moving forward?

2:30 PM
Crop Rotations – Slippery Slope or Economic Opportunity?
Anastasia Kubinec, Manager of Crop Industry Development, Manitoba Agriculture

The crop landscape in Manitoba has changed in the past 20 years, from a sea of wheat to yellow canola fields dominating and now rising acres of soybeans. The key recommendations for crop rotation has not though. The same crop in tight rotations on the same field eventually mean higher pest incidence and lower yields. So what is the “best” rotation to reduce pests and make the maximum return? Depends on your pests, what crops you can grow well in your area and how simple or complex you want to make it!

3:15 PM
Hedge Your Energy Costs at Five Cents for 30 Years
Alex Stuart, Senior Vice President, Sycamore Energy Inc.

Take advantage of Canada’s best solar rebate to lock your energy price below $0.05/kWh for the next 30 years. Come and learn how solar energy can reduce your operating expenses, and improve your energy independence. This presentation will cover the equipment used in solar installations and how you can leverage the Manitoba Hydro Power smart rebate.

An ecosystem Approach to Farming for improved Profitability, Stewardship & Job Satisfaction
Thursday, January 18th — AM
MNP Theatre

9:40 AM
Not My Grandpa’s Organic Farm
Katherine Stanley, Organic Extension Specialist, Manitoba Organic Alliance/University of Manitoba

“All four of my grandparents started their farming careers using what are essentially organic methods - crop rotation, livestock integration and some mechanical weed control.” - Martin Entz.

Modern Organic farming builds on these fundamentals, but involves a deeper scientific understanding of soil and plant process plus exciting new farm machinery. This presentation will highlight the latest approaches and machines available for organic farming on the prairies, and provide examples of what modern organic farming methods can offer.

10:10 AM
Cash Cropping With Intercrops
Colin Rosengren, Producer, Midale, SK

Colin will discuss the economic, agronomic and environmental impacts of intercropping. Intercropping is a multiple cropping practice involving growing two or more crops in proximity. The most common goal of intercropping is to produce a greater yield on a given piece of land.

11:10 AM
Organic Production 101 – Panel Discussion
Alan McKenzie, Producer, Nesbitt, MB
Andrew & Patty Harris, Producers, Stonewall, MB
Alexander Boersch, Producer, Elie, MB

This panel will highlight four producers who are in various stages of transitional and certified organic production. Alexander Boersch, Andrew and Patty Harris and Alan McKenzie all farm in Manitoba and have different levels of experience with organic production. Motivations, challenges and successes during the stages of change in production practices will be discussed.
1:00 PM

How Will Recent Tax Changes Impact the Farm?

Edith Frison, Business Advisor, Taxation Services, MNP LLP

2017 was a year of consultation for the Minister of Finance in Canada. His office consulted the public on many tax issues including the ability to defer grain tickets, sprinkle income, hold passive investments and convert income into capital gains. The government of Canada has now proposed and enacted some of the most significant changes to the Income Tax Act in generations. Join Edith to discuss how these changes to the Income Tax Act will impact family farms and farm corporations.

1:30 PM

Seeking Sustainability Through Innovation: A Look at the Cattle Industry

Kim Ominski, Professor, University of Manitoba

As the global population increases, the demand for animal protein is expected to rise. The agriculture industry, in particular the beef sector, is faced with the challenge of increasing production while improving economic and environmental sustainability. As input costs are expected to rise, along with competition for invaluable resources such as land, energy and water, we must adopt new management practices in order to improve sustainability of beef production systems.

1:50 PM

Manitoba Beef & Forage Initiative Inc. – Driving Innovation on the Farm

Ramona Blyth, Chair, Manitoba Beef & Forage Initiatives Inc. (MBFI)

This presentation will highlight the public-private partnership model of this research and demonstration farm, the importance of including all stakeholders to move the industry forward, and highlight some of the successes we’ve realized on the way.

2:10 PM

Trying to Fit “In” Sustainability

Trevor Atchison, Producer, Pipestone, MB

The presentation will talk about the juggling or struggling between financial sustainability, and environmental sustainability to be sustainable. Trevor will talk about the courses, tools and practices we have implemented such as rotational grazing and gross margin analysis. Adding how these tools have led to improving productivity of the land, cattle and our bottom line and push us to continue to find new tools, ideas and research (i.e. F1 females, utilizing genetic data to increase certain traits in calf crops) that continue our quest to be sustainable for future generations.

2:30 PM

A Producer’s Perspective on Building Sustainable Cattle Ranching Practices

Joey Bootsman, Rancher, Rapid City, MB

Personal experiences with sharing land with grain farmers, conservation groups, and varying land owners for financial sustainability. Relationships with environmental groups to cross utilize goals where environment and ranching can be sustainable.

2:50 PM

Evaluation of Soil Health Under Different Grazing Management Systems in Manitoba

Dr. Terence McGonigle, Professor, Brandon University

Soil health is normally evaluated in terms of productivity based outcomes, such as forage biomass or cattle gains. However, use of an indicator measurement on soil itself would allow prediction of outcomes, as well as provide an opportunity for management intervention to maximize profitability and preserve the integrity of the land. Soil organic carbon is one of several indicators that have been considered. We note that an important part of field productivity relies on microbe activity for mineralization and uptake to plants. Thus, the approach taken here was to test the use of microbial biomass carbon (MBC) as an indicator of soil health.

**Nokian TRI 2: For any terrain and any tractor**

Anyone who uses a tractor on and off the road knows that a typical lug tractor tire does not last long or provide much driving comfort on the road. That is why the Nokian TRI 2 was designed specifically for tractors that drive on the road. From roadside mowing to construction, from road maintenance to snow removal, the application range for the TRI 2 is almost limitless. The Nokian TRI 2 also features low rolling resistance which reduces fuel consumption. With fuel prices as high as they are today, the Nokian TRI 2 can help reduce the fuel cost for your business or municipality. Ideal under a wide range of conditions:

- Approved for speeds of up to 40 mph
- High driving stability on roads allows your operator to work faster
- Significantly longer tread wear on the road
- Excellent self cleaning
- Good traction off the road
- 19.5L24 size available for Backhoes
- Manufactured without aromatic oils that are harmful to the environment

Visit us at the Kal Tire booth or go to: KalTire.com/locations to find a store near you.

Inventor's Showcase

Inventor's Showcase is always a favourite and once again this year we have a great variety of inventions to peak your interest. Sometimes the inventor is a large manufacturer but most often it’s a farmer or small local company. We have 14 entries in this year’s Inventor’s Showcase! There have been many examples of successful products that had their start at Ag Days or a similar show. Inventions are judged at Ag Days with the top two receiving prizes.

The 2017 Winners were: Arnold Innovations: Combine Cylinder Reverser. Their product allows for the combines cylinder to be reversed using hydraulics and a custom engineered wrench, which when not in use conveniently stores in its own harness attached to your combine. They received a banner and a cheque for $1000 from Manitoba Ag Days and an advertising package from the Manitoba Co-operator.

Second Prize Inventor's Showcase – The 2nd Place Winner of the Inventors Showcase 2017 was the Devloo Canola Crusher. The Crusher is used to improve the process of testing canola for green seeds with a time saving more convenient method. The unit is portable, weighs 12 lb. measures 7 by 10 by 14 inches. They received a banner and a cheque for $500 from Manitoba Ag Days and an advertising package from the Manitoba Co-operator.
Being an agvocate is easier than you think and we can help.

Visit AgMoreThanEver.ca for resources and tips, and join our community of agvocates from across the country.

Speak from the heart
You live and love ag. Share that love with the world.
“Having a conversation with a consumer is actually not as hard as you think. You’re basically telling them what you do.”
— Ravi Bathe, Poultry and Berry Producer

Go where the conversations are
Be an active voice and help shape people’s relationship with ag.
“In order for consumers to support and understand us, they need to know us better. The best people to explain this are the people who live agriculture.”
— Natacha Lagarde, Maple Syrup Producer

Be open and honest
Transparency creates trust, so tell your story.
“What do we have to hide? Nothing. I eat the food I produce. If we tell our story honestly, people will trust us.”
— Sam Bourgeois, Apple Producer

Don’t know where to start? Here are a few tips.

Somebody
should speak up.

Somebody who sets the record straight.
Somebody should do something.
Well I’m somebody.
You’re somebody.
Everyone in ag is somebody.
So be somebody who does something.
Somebody who speaks from a place of experience, with passion and conviction.
Somebody who proudly takes part in food conversations big or small, so our voice is heard.
Somebody who tells our story, before someone else does.
Somebody who builds consumer trust so our industry can meet the demands of a growing, and very hungry, world.
Somebody who shapes people’s relationship with agriculture.
It can be done.
But it’s a big job that takes co-operation, patience and respect for every voice in the conversation.
We need to build lines of communication, not draw lines in the sand.
Be somebody who helps everybody see Canadian agriculture as the vital, modern industry it is.
Somebody who helps everybody see people in ag for what they are – neighbours, friends, and family who share the same concern everyone does: providing safe, healthy food to the people we love.
Our point of view is important.
Our story is important.
And people want to hear what we have to say.
So be somebody who takes, and makes, every opportunity to share it.
I’m somebody.
You’re somebody.
Together, we can tell everybody.
Inventor's Showcase Exhibitors

GEM-L
The Wilson Pacesetter equipped with the Agrilitc conveyor system provides farmers and coops with a year round, time and money saving piece of equipment. Fill air seeders, deep banders, and spreaders at over 4,000 tons per hour of grain which conventional Reverse Osmosis systems do not do. Our customers tell us it is the best landscape they have ever used.

Prairie Grain Analyzers
Prairie Grain Analyzers is the manufacturer of the first Canadian, portable, digital moisture analyzer. The MA-404 moisture analyzer provides precise moisture and meter reading results at operating temperatures of -20°C to 65°C. It includes a color touch screen, built in printer, Wi-Fi connectivity for remote updates, and a USB port that allows the user to label and store data on an Excel spreadsheet which can be accessed later on a computer.

Tide Industries
Zero Spray fits on the front of most common brands of Zero-Turn mowers. It comes fully assembled and pressure tested from factory. It mounts easily without any modification to the mower and goes from box to spraying in minutes. It has a simple on/off foot switch.

ROGA Drone
ROGA Drone is the first company in Canada to receive a Special Flight Operating Certificate from Transport Canada for aerial application of pesticide by UAV. The Kray protection UAV being used is uses ultra-low volume spraying technology and is a compound multi rotor UAV capable of speeds up to 110 kph. It incorporates ladder obstacle avoidance and has terrain follow to fly 1 meter over crop canopy. It has pre-flight mission planning and can be flown fully autonomously. The productivity range is from 300-600 ha/day.

Bradford
Wick Applicator - The product was designed to control weeds that stand taller than the crop that is being grown. It allows producers to apply chemical to targeted weeds without doing any damage to the crop.

The BinKnocker
The BinKnocker is a very simple tool to measure product levels inside of metal grain, fertilizer and frac sand bins from the ground on the outside of the bin. It is essentially a hockey puck on a loop of rope suspended on the outside of the bin by stainless steel brackets. In a matter of seconds one can unfasten the rope from the cleat, raise or lower the rope and flick it against the side of the bin. The hollow or full sound is unmistakable. You know instantly where that product is at.

Scher Gain
Our product has been developed as a safe, easy, and fast way to measure combine losses. With today’s large horsepower combines many growers are throwing profits out of the back of the combines due to excessive travel speeds or poor settings. We believe that the most money you can make per hour farming may be properly setting your combine. Invented to help farmers by farmers.

Bushel Plus
Bushel Plus is a remote controlled drop pan system that attaches to any combine without wiring. The operator has the choice of two different drop pan sizes that fit in different crop conditions and will release from a remote. For fast sample clearing right in the field, the set includes our unique BushelPlus separator unit. Provided is a field scale and reference guide to quickly determine your harvest loss.

Cooperhead Closing Wheel
Copperhead Ag produces the best, research and time proven closing wheels in the agriculture industry. Invented by farmers, tested by farmers. Copperhead Ag closing wheels produce the return on your seed investment.

Dave’s Welding Shop
It is similar to Tile Drainage but providing underground drainage in farmers’ fields. The idea is similar to Tile Drainage but without the use of expensive tile piping, hancesforth much lower costs with much higher travel speeds. *It works in all field conditions *G.P.S [R.T.K.] 1, I.D.A.R.R. compatible
Best New Product 2017

At Manitoba Ag Days you’ll always find the latest in technology and equipment with many new products that have just entered the market place which have never been seen before. Be sure to check out the exhibitors that have highlighted New Products for the 2018 show. They can be found by their signage identifying them at the show as well as the listing on our website www.agdays.com.

First Prize Best New Product - Winner of the Best New Product 2017 was SeedMaster - SeedMaster’s new Tunable Tower offers farmers new access to metering and distribution data and a way to respond to it. Another SeedMaster advantage to make sure you’re making the most out of your input investment and growing the best crop you can. Working in conjunction with the SeedSystem, individual seeds are actually counted as they’re distributed down they’re individual runs. The Tunable Tower has a centre cone that can be adjusted to balance product flow if variances are noted on the tablet screen in the cab of the tractor. This means valuable seed and fertilizer are efficiently distributed and placed in the ground. Tunable Tower technology means a smarter use of the inputs, a consistent and rigorous stand, and more money in your wallet.

Honourable Mention to: Eastwood Products for their Heavy Equipment Jack

Never Spill Spout Inc.
Full Bin Alarm
STOP spilling grain!
For your safety and convenience
Alarm sounds when bin is full!

Never Spill Spout Inc.

In 2017, 70% of WCB sales have been Repeat Sales or Referrals!
Satisfaction Money Back Guarantee

We have never been seen before. Be sure to check out the exhibitors that have highlighted New Products for the 2018 show. They can be found by their signage identifying them at the show as well as the listing on our website www.agdays.com.

2018 Bull Congress Exhibitors

Bull Congress can be found in Barn 11 which can be easily accessed by entering the NE corner of the Kinsmen Arena. There will be signage at the show also to help you find your way. A huge shout out to Robin Forest Products for the donation of the wood shavings.

Exhibitors 2018

- Anderson Cattle Company Inc.
- Andrew Hextall
- Bridgeway Livestock
- Come As U R
- Foxy Lady Cattle Co. / Pizazz Simmentals
- Freyburn Angus Farms
- Glasman Farms
- HBH Farms
- High Bluff Stock Farm
- JP Cattle Co.
- Konray Ranch
- LEJ Charolais
- Maple Grove Gelbvieh
- Mar Mac Farms
- Moose Creek Red Angus
- N 7 Stock Farm
- NYK Cattle Company
- Pure Country Simmentals
- RSK Farms
- Silver Lake Farms
- Welske Simmentals and Ten Meadow Livestock
- WRAZ Red Angus
Manitoba Ag Days offers the New Products Feature where exhibitors may opt to participate in this. Be sure to check out exhibitors that have highlighted New Products for the 2018 show. They can be found by their signage identifying them as well as the listing in the show guide and on our website www.agdays.com. All qualifying entries are judged and the Best New Product Award is presented at the show.

**A.R.K. New Tech Ltd.**
- Booth # 812 Erens Brothers Arena

The Farm Fans Quiet Dryer is 50% quieter than vane axial portable dryers. Not only is this dryer quieter, but it produces a more comfortable, less harsh tone. This patent pending feature, combined with the proven starfire burner used on existing vane axial FFI portable dryers, provides an efficient delivery of airflow to the burner. With a higher grain throughput than centrifugal fan portable dryers, the Quiet Dryer is a quieter, efficient solution to grain drying.

**AgCon Equipment Ltd.**
- Booth # 1432 Westoba Ag Centre Concours

The Pois-Track RT30 is ASV’s smallest compact track loader that is 48” wide, ideal for landscaping, working in barns and anywhere you need versatility and power in a smaller package. It has a safe and comfortable operator station that helps make your jobs easier, so you finish sooner and with better results. A wide range of performance-matched work tools helps you complete most jobs quicker and is affordable and good for all farm jobs.

**Agtron Enterprises Inc.**
- Booth # 1216 Westman Place Concours

With multiple products delivered into the same air stream, how do you know if one of the products stops due to meter failure, cavitation or other issue? Even if you have secondary blockage sensors, you probably won’t know if a meter fails to deliver. It’s difficult to sense when the canola stops in an air stream that contains 89% fertilizer particles! Works with Android or Apple tablets and ISOBUS Virtual Terminals.

**ATP**
- Booth # 652 and 652A Brandon Curling Club

Soygreen - Fighting Iron Deficiency Chlorosis (IDC) has just got easier! IDC has significantly reduced yield in Iron sensitive crops such as soybeans, dry beans and flax. Soygreen is the only form of iron (patented Ortho-Ortho Fe EDDHA) proven to prevent and correct IDC. In response to grower’s seeding equipment issues with liquid application, Soygreen granular has been developed. ATP Nutrition is excited to have Soygreen granular available for the 2018 season. Soygreen Treated (left) vs. Iron Deficiency (right) -12.9 bushel yield gain. (Hunter, ND 2013).

**CropPro Consulting**
- Booth # 1346 MNP Hall

SWAT MAPS / SWATBOX

SWAT MAPS is CropPro’s variable rate seed and fertilizer prescription service for Western Canadian farmers. Its foundation is based on Soil, Water, and Topography Data. SWATBOX is a tool that collects the soil electrical conductivity data required for SWAT MAPS. SWATBOX is powered by and towed behind a farmer’s seeding or tillage tool and does not require the attention of the operator. Once SWATBOX receives power from the tractor, it automatically starts recording geo referenced soil data that is wirelessly synced to the CropPro server.

**FMC**
- Booth # 613 to 615 Brandon Curling Club

Authority Supreme is a soil-applied, pre-emergent that combines two modes of action for extended control of tough to kill grass and broadleaf weeds.

**Gallagher**
- Booth # 1026 Westman Place Arena

Gallagher’s new touch screen scales and data collection systems at Manitoba Ag Days. This new line of Touch Screen Livestock Scales is about usability which is strongly reflected in their touch screens. Their full colour displays deliver maximum screen visibility regardless of sun light conditions. They are designed to be robust and tough in harsh operating environments, repelling water and capable of taking abuse.

**MacDon**
- **M1 Series Windrower**
  - Next Level Windrower Performance M1 Series Windrowers continue Mac-Don’s tradition of bringing harvesting innovation to the field. These all-new Windrowers deliver power, performance, comfort, and speed. Powerful Cummins engines deliver increased header drive capacity on three interchangeable cutting platforms to power through the toughest harvesting conditions. Cut at speeds up to 18 mph as the all new patented CrossFlex™ Suspension absorbs impact from rough terrain allowing a smooth, clean cut. Two stage controls and One-Touch-Return buttons give operators precise control and customization of header functions. Setting a new standard in Windrower technology, the M1 Series is the next level of harvesting performance.

**MacDon**
- **D1XL Series Draper Headers**
  - Super-sized Harvesting Performance - MacDon harvesting performance is now available on an extra-large scale with the all-new D1XL Draper Header. D1XL Drapers feature an ultra-deep deck with 50” wide drapers. These wide drapers perform with ease in big, bumpy, high-volume crops, and deliver up to 30% increased capacity in heavy crop conditions. Setting a new standard in draper header technology, the D1XL takes harvesting performance to the next level.

**MooCall**
- Booth # 923 Kinsmen Arena

MooCall HEAT offers a unique approach to heat detection by placing an eartag on every cow and a battery powered collar attached to the bull. Using a combination of the bulls behaviour, mounting activity and proximity we can reliably diagnose cows in heat. When a cow is in heat, we use SMS messaging to notify the user and automatically record your breeding calendar to our free Breedma-nager App.

**Overton Environmental Enterprises Inc.**
- Booth # 234 UCT Pavilion

EcoTea™ is a biological inoculant designed to enhance and promote the growth of seedings by introducing plant growth-promoting microbes to the seed coat. Our tested EcoTea™ Dry and Liquid SeedTreatment coats seeds uniformly and will not clog or bridge in air seeder applications. Custom microbial blends for cereals, beans, canola and specialty crops that Improves Root Development, Improves Stress Tolerance and Improves Crop Performance. Trusted By Professionals.
Pentair – Hypro

Booth # 1430 and 1431 Westoba Ag Centre Concourse

The 3D spray nozzle was developed using over 10 years of application and wind tunnel research to optimize the droplet spectrum and spray incline to provide maximum coverage. It was co-developed with Syngenta and has been proven using field trials to provide a 10% increase in pre-emerge weed control. It comes standard with Hypro’s new “SnapLock” cap that-assemblies to nozzle bodies much easier, requiring 73% less torque than our standard nozzle caps. It is also the first flat fan to gain LERAP drift reduction, achieving 60-75% drift reduction over a flat fan at low pressures.

Pentair – Hypro

Booth # 1430 and 1431 Westoba Ag Centre Concourse

9310 Series ForceField Centrifugal Pump - This wet seal technology pump provides ultimate protection of the mechanical seal against dry run conditions or chemical bonding failures. By using a barrier fluid in a separate chamber, the seal consistently stays lubricated and cool. This process extends the life of the pump and provides a worry free operation throughout the growing season. It is designed to be an exact drop in for standard Hypro hydraulically driven centrifugal pumps, have flow rates up to 311 GPM and can produce up to 150 PSI, and are available with cast iron or stainless steel volutes for superior resistance to harsh chemicals.

Pentair – Hypro

Booth # 1430 and 1431 Westoba Ag Centre Concourse

Duo React is a pneumatically actuated single and a 4-way nozzle body incorporated into one compact unit. The Duo React nozzle bodies eliminate the need for twin lines of “back to back” configurations. Duo React nozzle bodies provide operators flexible flow rate through being able to select different nozzle combinations from the cab via a controller automatically to spray at their desired speed while maintaining a consistent application rate. The entire system will be be operating throughout the show in the Hypro Pentair booth.

Capstan

Booth # 1624 to 1626 Barn 2

Seed-Squirter® - Applying an accurate dose for each seed was never truly possible. Until now. Seed-Squirter® has changed the reality of planter liquid application. Each seed gets a perfectly timed chemical dosage. Every seed lands in a “just right” environment so every plant has the optimal start. The chemistry you want can now be placed precisely where it’s needed per seed.

Valley Agro Services

Booth # 508 Hitching Ring

NECO has designed an elite dryer with state of the art user-interface, components and moisture control. This screenless, mixed-flow dryer features the user-friendly Commander control system with Dryer Master moisture monitoring. Dryer Master moisture control provides dual sensor monitoring that is second to none. Remote management along with several other options are available to suit your farming needs.
Parking Lot Shuttle

We are trying something new this year!! There is going to be a bus circling the parking lot picking up patrons and dropping them off at the top of the ramp. The bus will then pick up patrons at the top of the ramp and return them to their vehicles.

Murray Chev-Olds has once again come on board as the sponsor of our shuttle; only this year you won’t have to look for a half ton in a sea of half tons in the parking lot instead you can check out the half tons in their new location in City Square Exhibition Hall Booth # 475A. Please be sure to use this service to secure it for future shows.

Information Booths

Our information staff are always ready to help you find your way at the show. Whether you’re looking for a particular exhibitor or just need to get to another part of the building they are willing to assist you. Our staff are friendly and take great pride to answer our visitor’s questions.

The Manitoba Ag Days Board would like to thank Norman Brown for 19+ years of volunteering at the show. Your willingness to help others and your bright smile will never be forgotten. If you see Norm at the show thank him for his dedication to our show. Kathy Birmingham will be the new leader of our volunteer team.

The Heliodor 9 is your perfect choice for efficient stubble cultivation and residue management. The unique disc attachment provides a dual cutting angle that allows you to work shallow but also across the entire soil profile. The combination of mixing and leveling creates a seed-ready field after one pass.

- Independently mounted discs offer maximum clearance for high residue and low maintenance
- Leaf springs create disc vibrations for a self cleaning effect and superior crumbling
- Integrated rollers deliver precise depth control

Farm Safety Messages

Farm Safety is of the utmost importance to our board and we want to keep our patrons, exhibitors, friends and family safe. So we created “The Farm Safety Feature” at our show to highlight companies and organizations that are doing their part to keep people safe. Watch for these 10 exhibitors throughout our show with their special signage! We are pleased to have the The Canadian Agricultural Safety Association join us with their new “BeGrainSafe” mobile grain entrapment demo trailer at the 2018 show. Last year they had to borrow their friends unit from the states but this year they are going to have their actual Canadian Unit at the show. They will be running demos every hour on the hour at the show out on the Westman Place Arena Ice Surface!

CASA
Booth # 1001 Westman Place Arena
The BeGrainSafe program is about saving lives. The BeGrainSafe mobile unit raises awareness about the hazards of moving grain at events like Manitoba Ag Days. It is available for training first responders in rescue techniques and by larger farms to develop customized emergency procedures. Thanks to the BeGrainSafe Sponsors for making this program a reality!

Lakeshore Sales
Booth #1802 Barn 4
The ChuteMax Remote Control“Tuck Chute Opener allows the operator to stand out of the dust and away from the auger while unloading grain. Fill your air drill from on top of the tank without the hurry and stress of rushing down the ladder. This easy to use remote controlled 12 volt system is a must have for today’s busy farming operation.

Manitoba Farm Rural & Northern Support Services
Booth #1128 Westman Place Arena Concourse
“A healthy farmer is a safe farmer. Call the Manitoba Farm, Rural and Northern Support Services or connect with us online. Free and confidential. Information, support and counselling for farm families. 1-866-367-3276 or www.supportline.ca”

Manitoba Hydro
Booth #240 UCT Pavilion
What piece of farm equipment contacts overhead power lines the most often? Learn more about Manitoba Hydro’s farm safety programs to protect you and your family. You’ve got a lot on the line!

Never Spill Spout
Booth #402 City Square Exhibition Hall
Full Bin Alarm-SAFTY & Convenience *Never climb high Grain Bins *Never plug an Auger *Never overfill a Bin! It is not just a FULL BIN ALARM, but also a complete Auger Spout with No Snap Spout and Nightlight! Too many serious injuries and death occur every year by climbing high Grain Bins! We have more than 8000 sold. Most of the comments we get are: “I haven’t had to climb a bin in years”. From a SAFETY perspective, Farmers using the Never Spill Spout will never have to climb High Bin Ladders to visually check grain levels!

Rostech Electronics
Booth #1311 Westman Place Arena Concourse
Looking for a simple Plug and Play security/surveillance camera system for your property/home/business? Ideal for monitoring your storage tanks, driveway, fence lines, gates, and more... Rostech’s line of full 1080p HD IP cameras are designed for these purposes. The RSPIZZY Camera package comes with everything you need to get you up and running with a starting security/surveillance camera system!

Soaring Eagle
Booth # A179 and 1820 Barn 4
Soaring Eagle Grain Equipment Inc. has designed an all new feature, it is the first of its kind on the market. It is an anti-accident safety feature for belt conveyors/swinging drive overs. If anyone or anything is on the belt; it will stop the belt and keep it from going into the auger flighting.

The Bin Knocker
Booth #1826 Barn 4
The BinKnocker was born with safety in mind. Having to monitor bin levels during a busy season requires climbing ladders often. Patience, hurry and sometimes wet or icy conditions increased the hazard. Often the ladder leaning against the bin was unsafe. The BinKnocker nearly eliminates the need a ladder to check our bin levels. This job is now done from the ground in a fraction of the time.

Bushel Plus
Booth 1828 Barn 4
Bushel Plus was born years ago when we were measuring harvest losses by running beside combines and throwing pans underneath. Always close to the back tire and dust, we realized we needed to come up with something that is safer and faster for farmers, agronomists and product specialists. Our customers around the world have continued to comment on the efficiency and safety that our remote control drop pan and cleaning system provides them!
