Many post frame shops end up with a concrete floor. At CIA Buildings Ltd., we can build your shop to be ready for a concrete floor and do the pour for you! CIA Buildings Ltd. will build your shop to the appropriate elevation of your finished concrete floor, build the blocking into the wall design, and leave you with a concrete floor finished to your desire.

CIA Buildings Ltd. is also an authorized U-Drain dealer. Your new shop could have a discrete floor drain and sump system with the appropriate slope to keep the water where it should be.

CIA Buildings Ltd. does concrete in-house, keeping rates competitive and ensuring the job is done right the first time. Having the crew in-house also ensures excellent communication between the building erectors and concrete crew to ensure every detail of the building’s construction is complementary to your concrete floor and aprons.

Top of the line concrete work is just one more way CIA Buildings Ltd. guarantees your shop is Built For Life!
