Big Nutrition, Big Yields

**TM Agricultural**
Our flagship product is used to stimulate strains of beneficial microbes in the soil that have become dormant. The result: softer, more mellow soil which translates into higher organic matter, better water retention, improved percolation and increased yields.

**PH Adjuster**
Used to help balance the pH in the soil. Helps mobilize heavy metals. The result: proven increased crop yields, by unlocking nutrients due to salinity issues.

**Seed Germination**
Apply during seeding or up to 120 days prior. Results in early emergence and more even crop growth.

**Herk Foliar Fertilizers**
Scientifically proven to be the fastest way to get essential nutrients into a plant! Our HERK MAXXX crop specific foliar blends will give your crop the muscle it needs to compensate from soil deficiencies, with our full package of high quality chelated micro nutrients and trace elements. Increase yield potential and put bushels in your bins.

**SHOP HOUSES AVAILABLE!**

The best of both builds: Shop-houses, sometimes referred to as shouses, have been increasing in popularity over the last few years. Combining a full-sized shop with the comfort of a two-story home under one roof can really maximize the cost efficiency and functionality of your new build.

CIA Buildings Ltd., is a licensed general contractor, registered with the Alberta New Home Buyer Protection Office, and has several properties in good standing with the program.

CIA Buildings consults with local inspectors and meets local codes, ensuring that your project is built right the first time, and without any surprises.

With the capacity to construct large, clear-span shops, building practices and methods that reach or exceed National Energy Code standards, and prior experience building shop-houses, CIA Buildings is the ideal fit to help see your project to completion.

Whether you are looking for a ranch house, a recreational facility, or a new home, consider a shop house that is built for life!
