RTMs FOR SALE

What is a RTM home?

RTM stands for "Ready-To-Move". Ready To Move Homes are conventional homes that are built at our lot. These homes are built with crawl space foundations. All our RTM's are built in one piece. RTM's should not be confused with modular homes or manufactured homes as the quality between the three can differ greatly.

- All of our RTM homes are built to CSA standards
- All of our RTMs are locally built
- We have various RTM floor plans available
- Buyer is responsible for hook-up, delivery, site prep (screw piles / foundation), utility services and septic

You want to be 100% confident when choosing a Ready-To-Move home builder. You want your builder to care about your RTM home as much as they would their own. You deserve to feel confident in Wetaskiwin Co-op as your RTM home builder.

Profit with purpose

Ducks Unlimited Canada forage programs support producers and their bottom line while enhancing habitat.

Our Marginal Areas and Forage Conversion Programs provide incentives for qualifying producers to convert cultivated cropland and unproductive areas within their operations into perennial cover. Seeding perennial forages in those unproductive or difficult-to-manage areas can provide a host of benefits, such as helping curb herbicide-resistant weeds and supporting pollinators, while boosting producers' bottom line. Forage crops provide a sustainable source of livestock feed and promote crop diversity.

CONTACT DUCKS UNLIMITED CANADA TODAY TO LEARN HOW YOU CAN BENEFIT FROM THESE PROGRAMS!

Rollformed to Custom Lengths - Manufacturer Direct

Stop trespass farming. Keep it natural.

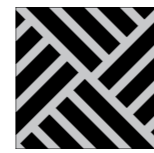

Public roadside ditches and right-of-ways provide a multitude of benefits.

- Naturally-vegetated public roadside ditches and right-of-ways:
- Filter excess nutrients including phosphorous and nitrogen, preventing them from entering our rivers, lakes and groundwater systems.
 - Minimize overland flooding by storing, slowing and absorbing excess water, helping to protect roads, culverts and agricultural fields.
 - Store thousands of tons of carbon, preventing it from entering the atmosphere.
 - Provide homes for pollinators like bees, butterflies, moths and beetles.
 - Sustain species that prey on agricultural pests.
 - Provide thousands of acres of habitat for grassland-dependent mammals and birds, including pheasants and grey partridge.

Keep public roadside ditches and right-of-ways natural.

Episode three is here!

WELCOME TO THE

FARM SHOW

A WESTERN PRODUCER DOCUMENTARY SERIES

EPISODE 3: Six Inches of Topsoil

Watch it now!

SCAN TO
WATCH

It's been said we owe our existence to the fact that we have six inches of topsoil and the fact that it rains. At **Ag in Motion** there are hundreds of seeded crop varieties in small plots for demonstration. And while you can literally see the crops growing over three days of the show, there's definitely drama when you invite thousands of farmers to come tour them!

Get an insider's look at what it takes to bring new crop innovations to the fields of farmers across Western Canada.
